T3 – Perform Queries on a table

Queries:

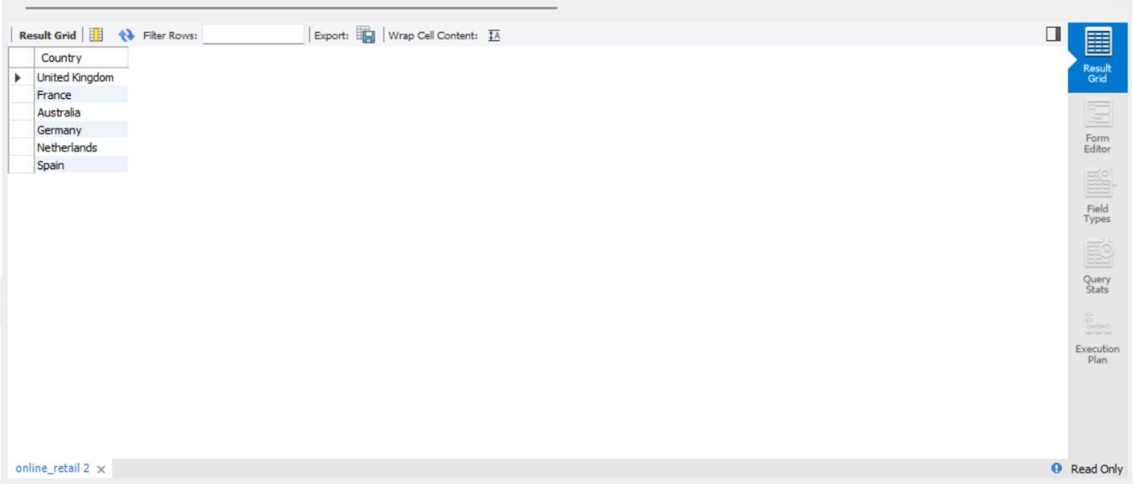

1. **Count total records**

   SELECT COUNT(*) AS Total_Records
   FROM online_retail;

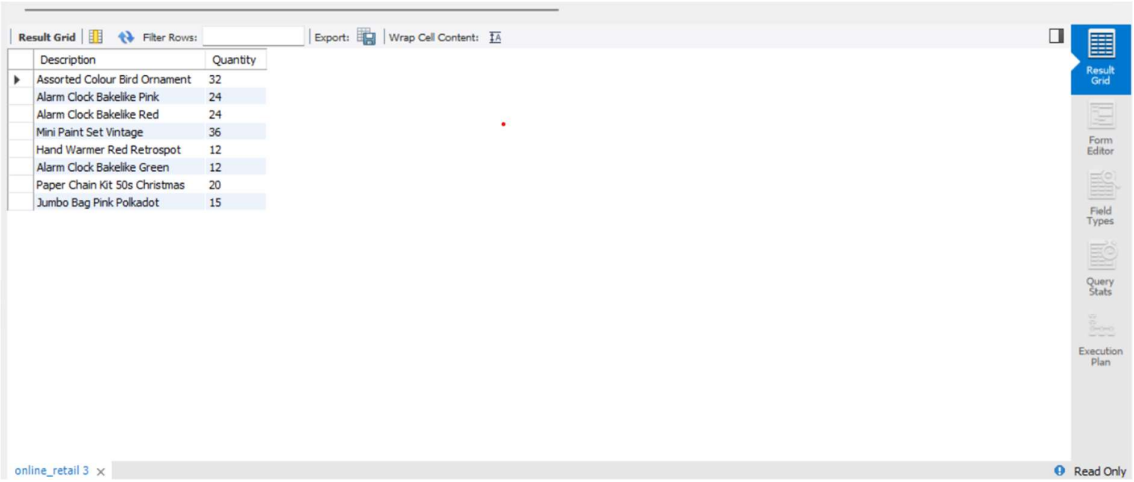

2. **Find unique countries**

   SELECT DISTINCT Country
   FROM online_retail;

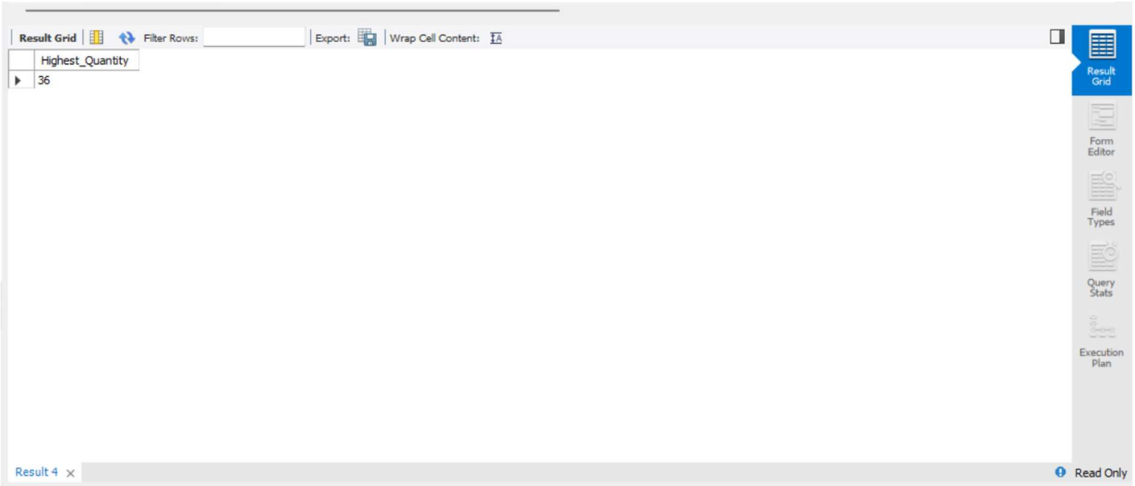

3. **Find products with quantity greater than 10**

   SELECT Description, Quantity
   FROM online_retail
   WHERE Quantity > 10;

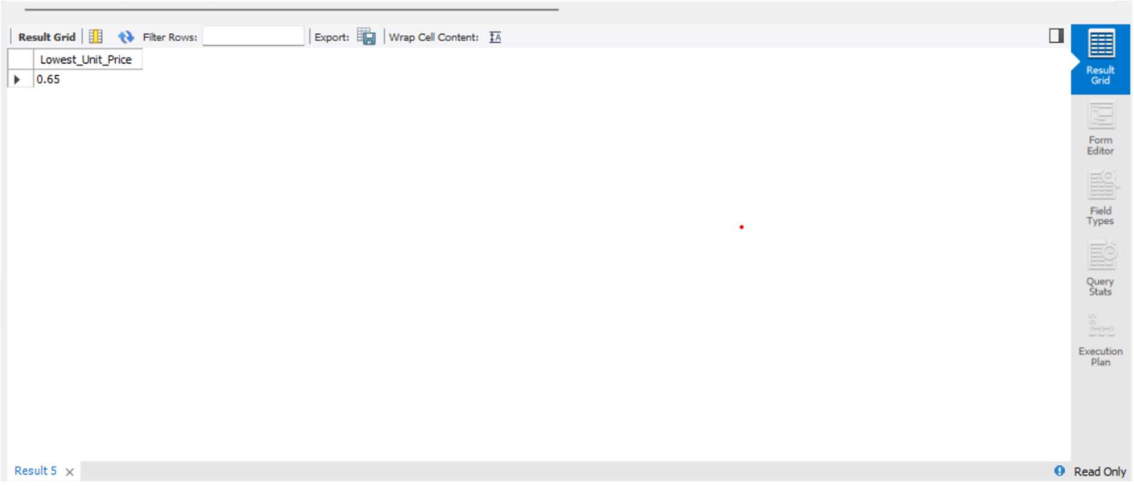

4. **Find the highest quantity**

```
SELECT MAX(Quantity) AS Highest_Quantity
FROM online_retail;
```

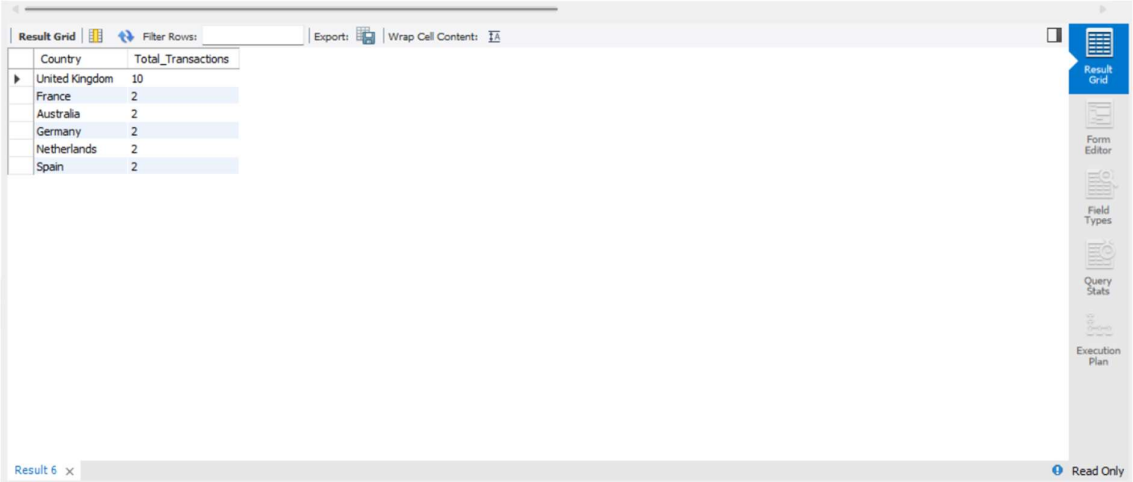

5. **Find the lowest unit price**

```
SELECT MIN(UnitPrice) AS Lowest_Unit_Price
FROM online_retail;
```

6. **Count transactions by country**

```
SELECT Country, COUNT(*) AS Total_Transactions
FROM online_retail
GROUP BY Country;
```

7. **Find countries with more than 2 records**

```
SELECT Country, COUNT(*) AS Total_Transactions
FROM online_retail
GROUP BY Country
HAVING COUNT(*) > 2;
```
